SUMMARY

Experienced Full Stack Developer with 5 years of expertise, specializing in Java for building modern web applications. Proficient in both Frontend and Backend technologies, including HTML, JSP, CSS, JavaScript, jQuery, SQR, and Informix. Skilled in creating and managing RESTful applications, with hands-on experience using tools such as Jira, Jenkins, Git Bash, and GitHub. Familiar with development and deployment environments including SecureCRT, WinSCP, Eclipse, and DBeaver. Proven ability to develop, debug, test, and deploy secure and scalable Java-based applications. Seeking to leverage my skills in a Software Developer role to deliver innovative and reliable software solutions.

PROFESSIONAL EXPERIENCE

SOFTWARE DEVELOPER

Cognizant Technology Solutions | Kolkata | February 2021 – Present

Project – LightSpeed (Marriott International's Property Management System):

A web application used by Marriott Hotels Front Desk associates to manage core hotel operations such as reservations, guest billing, housekeeping, and reporting.

Built using Java, JSP, JavaScript, jQuery, CSS, Informix, SQL, and SQR.

Key Modules & Contributions:

- **Malaysian E-Invoice Compliance:**

Implemented features to support Malaysia's e-invoicing mandates by capturing Tax Identification Numbers (TIN) and related invoice data for guests, groups, companies, and properties.

Ensured compliance with government regulations on electronic invoicing and tax reporting.

- **Island Browser Migration:**

Migrated the application from Internet Explorer to the more secure Island Browser.

Reviewed and updated front-end scripts and workflows, coordinated with QA, and validated all modules for browser compatibility.

- **Thailand Provincial Tax Implementation:**

Integrated tax calculation logic for Thailand-based hotels, adhering to local government tax policies.

Ensured accurate application of provincial taxes across relevant transactions.

- **Database Maintenance Screen Migration:**

Migrated legacy screens (Special Services, Transaction Code, Billing Pattern) from a SecureCRT-based C++ application to the Java-based LightSpeed UI.

Enhanced accessibility and usability of these administrative tools for hotel associates.

- **Enhancements:**

Continuously contributed to system improvements by developing new features across various modules. Key enhancements include enabling special service code integration with rate plans, empowering admins to manage users, enforcing extra credential validation for cash/cheque payments, and improving reservation search by company name — among many others based on business needs.

SKILLS

Technologies: Java, SprintBoot, HTML, JSP, CSS, jQuery, JavaScript

Database: Informix, MySQL

Software: SecureCRT, WinSCP, Postman, Eclipse, IntelliJ, Dbeaver

Productivity: Jira, Jenkins

Version Control: Git Bash, GitHub

Work: Adaptability, Team Work, Leadership

EDUCATION

BACHELOR OF TECHNOLOGY COMPUTER SCIENCE & ENG.

Bhilai Institute of Technology, Durg (CSVTU)

2016 - 2020

CERTIFICATION

- NPTEL Programming in Java
- Android & Java Developer Course by Paulo Dichone
- Front-End Web Development with React by Hong Kong University of Science and Technology
- Front-End Web UI Frameworks and Tools: Bootstrap 4 by Hong Kong University of Science and Technology
- Initiating and Planning Projects by University of California
